COMM PARTNERS
CONNECT

Current On Net Footprint

(Inclusion does not imply full-LATA Coverage)

- Carrier-class IP network with national coverage
- Best-of-breed technology
- CLEC Status
- Facilities-based carrier
- Proven services and billing platforms

Carrier-class IP Network

- CommPartners Connect's network is built using a "hub-centric" topology consisting of 4 "Super POPs" located strategically across the country in New York, Las Vegas, Atlanta and Chicago.

“Best of Breed” Technology

Utilize equipment from “best of breed” vendors in our nationwide, private network that creates a “meshed” IP backbone between SuperPOPs

- Class 4 nationwide switch network: Lucent/Telica, Sonus
- Session border control: Acme Packet
- Router core: Cisco
- BSS/OSS: CommPartners Management System (CMS)

Utilize multiple, Tier-1 telecommunications carriers and service agencies to create a "Carrier Class" IP communications network

- Internet backbone connectivity: Internap, Level 3, Nevada Nap
- Nationwide MPLS network: Level 3, WVFiber
- Regional TDM distribution network: Level 3, Broadwing, XO
- SuperPop facilities: Equinix, Level 3, Nevada Nap
- Proactive 24 x 7 NOC: CommPartners Engineers

- OSS/BSS
 - We have 10+ years experience with telephony operations
- Supports billing and settlement for:
 - Domestic Termination (LRN based billing)
 - DID Origination
 - Toll Free Origination
 - International LD
 - Interconnect services
 - Hosted IP applications
- FTP access for daily CDR reconciliation
- Detailed billing reports and summaries
